

## Creating a Web-based Guestbook

To get started with the Guestbook:

You can access the Guestbook by going to <http://www.yoursitedomain.com/guestbook/>; if you wish to login and delete entries from the guestbook, go to <http://www.yoursitedomain.com/guestbook/admin/> and login with the username 'admin' and the password that you selected when installing the Guestbook. To prevent spam or junk posts in your guestbook, each user who posts must enter a verification code from an image that is displayed on the "Add Entry" page.
